# WEEKLY BULLETIN

PUBLISHED EVERY THURSDAY BY THE STUDENT - FACULTY ASSOCIATION

SENIOR EDITOR: WM. HOWARD

JUNIOR EDITOR: BRUCE WILLIAMSON

Vol. 1, No. 7

Thursday, January 11, 1934

Sunset Fri. 5:03

## Medical Research

There has been considerable difference of opinion as to the place of research in the program of a medical school insofar as undergraduate study is concerned. The already overcrowded curriculum does not permit of the expenditure of much time on the part of the medical student to work out problems of magnitude. On the other hand, he would be considerably benefited to learn the purposes and methods, and to acquire some of the spirit of research, for these principles are fundamental in the conduct of a successful clinical practice.

To be more specific, the student would like to know the direct benefits of a research program of a medical school as far as he is concerned individually. These benefits are too numerous and ramified to discuss with any degree of completeness in a short note such as this, and only a few general principles can be mentioned. The student may be influenced to some extent by the benefits of contact with an organized research laboratory, and perhaps also by the results of the investigations carried out therein. He is benefited to a greater extent, however, by the indirect benefits gained from the individual who may be his teacher and who is carrying out a program of investigation. For example, if the teacher is engaged in clinical research, the student benefits directly from any discoveries which are made in the field of medicine. Naturally, the more academic and highly technical investigations are of less interest and value to the undergraduate. Research work will make the investigator a better teacher because it broadens his aspect of the problems of his branch of medical work.

It may be said in conclusion that every worthwhile bit of research elevates the scientific world's estimate of the institution from which it emanates, and naturally of the student's diploma which the school bestows on him at the completion of his work.

Dr. C. B. Courville

## Hawaii Bound

Last Sabbath, January 6, Dr. Taylor sailed for Hawaii where he will be for a few weeks on a much needed and well earned vacation. It is difficult to say just what will happen if he returns with added energy and vigor to his already effervescent personality.

## Library Behavior

"A library," quoting from Webster, "is a collection of books, pamphlets, etc., kept for reading and consultation, especially such a collection arranged to facilitate reference."

"What a blessing such a collection is if rightly used. There must of necessity be some plan followed in order to make these books serve most efficiently the group for which they are intended. In other words, each book must be properly charged out and charged in to the library again. Then, according to the rule of all good libraries, the borrower is responsible for the borrowed book until it is returned and properly checked in.

It is a very regrettable fact that some of the users of our school library have betrayed confidence and taken books from the shelves and out of the library without having them properly charged. This method of getting a textbook or reference work is absolutely unfair, and causes so much inconvenience to others who depend on the library copy of the book for study.

Now that we are beginning a new year, 1934, why not pledge ourselves, each user of the library, to use our privilege honestly, and guard the rights of our fellow classmates as diligently as our own. V. Behrens.

## The Calendar

Friday evening: Elder Floyd Smith, Jr.  
student of medicine and former missionary leader in India.

Sabbath: Elder F. C. Gilbert

Sat. night: Nurses' Pageant

8:00 o'clock. Adults 25¢  
Children 15¢

### Announcing

The Committee on Formal Programs has arranged a Supper Club date for Thursday night by Dr. Baxter, Dean of Theology of the University of Southern California. The music will be provided by Mr. Hosea Arias.

(o) (o) (o)

### Encroachments

The toll of medics taken by matrimonial extravagance during the holidays was second only to the New Year's flood. We understand that the present lull is soon to be broken by more startling announcements. That is if Hussong can shake his siege of pleurisy in due time.

### Music Pageant

The History of Nursing Class of the White Memorial School of nursing are giving a Pageant depicting nursing from the beginning of time. Several scenes from the Pre-Christian Era, Early Christian Era, Periods of Feudalism, Chivalry and the Crusades, and the Dark Period of nursing, bringing in the various attempts for reform in nursing, will be given. The work of Florence Nightingale and her successors in bringing about the advances toward modern nursing, as well as scenes of nursing work during the World War, will be portrayed. The characters and scenes of the various periods of history as related to the care of the sick will be interesting, instructive and beautiful. Come and enjoy it!

(Saturday evening, January 13, at 8:00 o'clock in Paulson Hall). M.E. Borg.

### The Cartoon

1. A multiple stage operation.
2. An anesthetist kind but very firm.
3. The word "ether" is misleading. In reality it is that twilight sleep phenomenon,

4. The surgeons are of that new radical school, bent upon perfection.
5. The patient is in shock.

### Forecast of Winter Sports

The recent rampage of Dame Nature was found to echo its challenge for supremacy even in the best of ice-skating circles. At the present it is still the chosen pastime, and many are enjoying this sport every Sunday at 7:30 p.m.

As coming events cast their shadows before them, we are very hopeful and expectant of seeing interesting games between the Faculty, Senior and Junior hockey teams in the near future, according to the vim, vigor and vitality revealed in the shadows of talk, spirit and action. F.C. ReBell.

### Let Us Attend

There are times when the average medic is so thoroughly sorry for himself, and perhaps justly so, that at the end of the week of work his relaxation is complete. Sufficiently complete at least to provide an excuse for missing Sabbath School. But there is no reason for the routine omission that we can so easily adopt. The program of our Sabbath School seems to be planned, and is executed rather well; and it is worth attending. The personal good to be obtained from the exercises and the lessons offered for our benefit, contain perhaps at least a little of that building material that our educated characters need. An Observer.
